**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-26, drawn to a method and apparatus for repairing a soft tissue tear, classified in class 606, subclass 228.
  - II. Claims 27-36, drawn to a flexible member holder and device, classified in class 606, subclass 144.
2. The inventions are distinct, each from the other because of the following reasons:

Group I is a soft tissue suture capable of being delivered and handled by numerous ways, such as tissue punch or needle. Group II is a specific delivery device which could be used to deliver medicine, medical tools, or endoscopic devices.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Fish and Richardson on 18 September 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3765

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
